

FBM IT Workshop

Description

The [FBM IT Service](#) organizes several IT Workshops to highlight tools or services available at UNIL and that can be used by the FBM community in the daily work.

2019 Programm

DCSR - Computing, research data storage and migration

The Scientific Computing and Research Support Unit (DCSR) of the UNIL IT Center (Ci) presents the new storage and computing infrastructure for research available at UNIL and explains how to use it. The presentation includes the research data migration process from the current NAS to the NAS dedicated to the research and mentions the archiving process for past research projects.

Slides

Competency Centre in Bioinformatics (BIX)

The new Competency Center in Bioinformatics presents the news services available and indicate how to contact the team.
