# Saving the printing settings (Mac)

## Product concerned

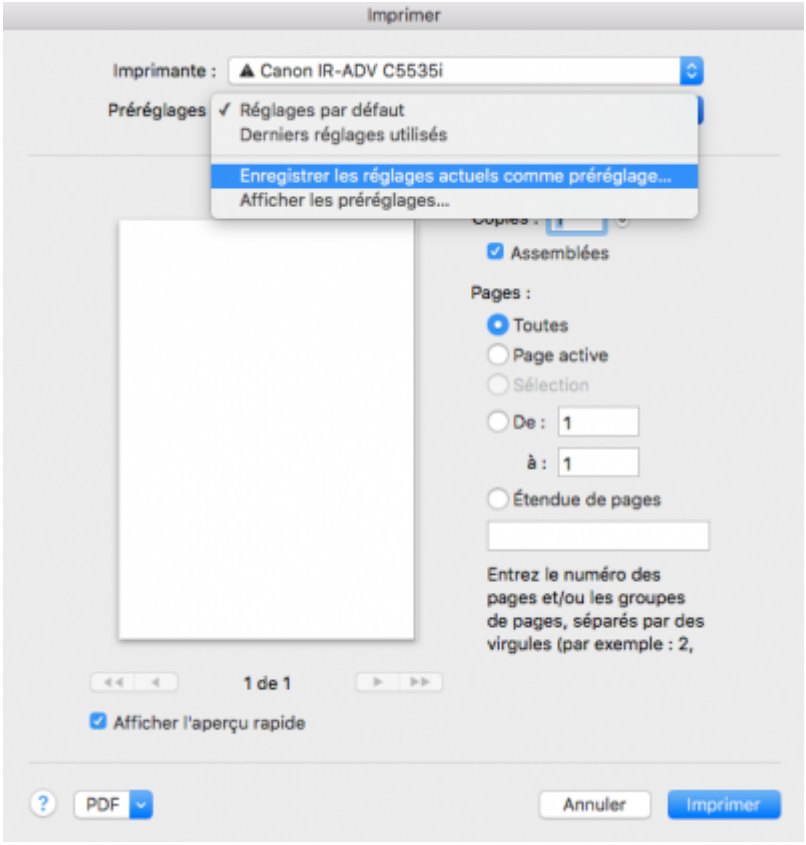
| | Name | Version |
|---|---|---|
| **System** | OS X | >=10.6 |

## Description

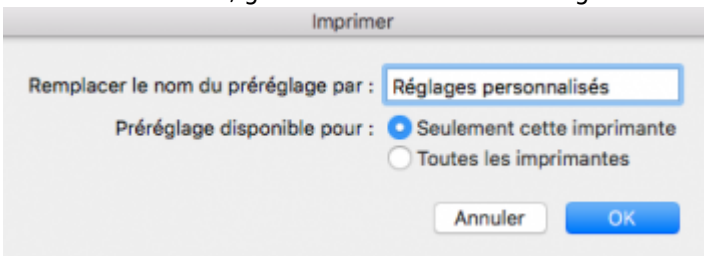
How to save the custom printing setting using a Mac.

## Solution

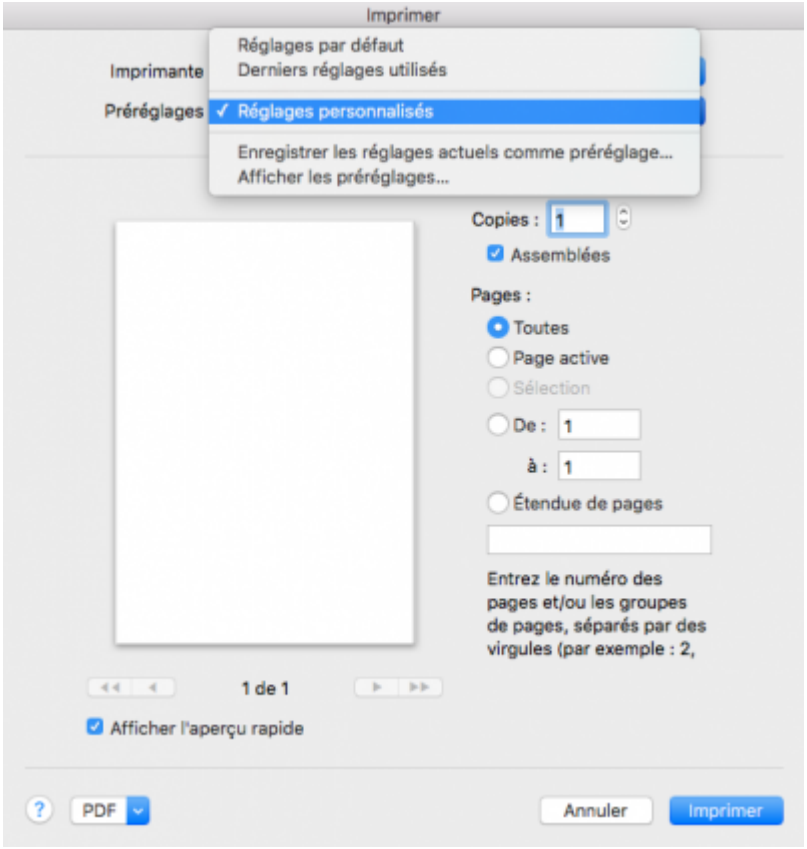
- Go to **File → Print** or click on **cmd+P**.
- Choose the settings (black and white/color, duplex printing, etc.).
- Choose **Enregistrer les réglages actuels comme préréglage...** in **Préréglages**.



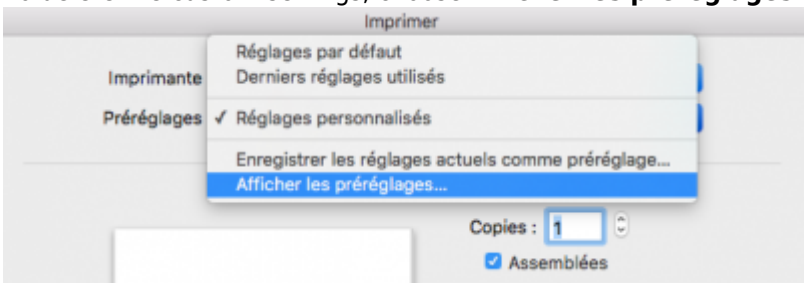
- In the new window, give a name to those settings in the field **Remplacer le nom du préréglagle par:**.



- The custom settings are now available in the list.



- To delete the custom settings, choose **Afficher les préréglages...** in **Préréglages**.



- Choose the custom settings in the left list and click on **Delete** than on **OK**.
