Connect to the NAS (Windows)

How to connect to the NAS (nas.unil.ch) with Windows. This process will allow you to visualize your files on the UNIL's server in your Windows Explorer.

**OSX documentation**

**Connection**

- Right click on “This PC” (Windows 10) and choose “Map network drive...”

- Enter “\nas.unil.ch\FBM” in the address bar
- Uncheck **Reconnect at logon** if the connexion to the server is only temporary.
- Check **Connect using different credentials**

- Enter “ad\” + “UNIL username” (for ex: “ad\qbuache”).
- Enter your **UNIL password**
- Click on **OK**
• Click on “OK” and then “Finish”.
• Open “This PC” (Windows 10)\(^1\) and click on the new mounted network drive:

Create a shortcut

• Right click on a folder and choose “Create shortcut”. The picture below shows how to create a shortcut on the desktop to the “DEC” folder.

1) \(^2\) “My Computer” on Windows 7 or “My Workplace” on Windows XP
