

Logitech MeetUp

Description

User documentation for the Logitech MeetUp camera. This camera can be used to film and capture the sound of all participants in a videoconference in the Grand Auditoire, Petit Auditoire, and Library.

Hardware

- Logitech MeetUp camera mounted on the wall/desk/tripod
- Laptop with USB-A port and HDMI port (or suitable adapter)
- In Grand Auditoire: Projector with HDMI connection
- In Petit Auditoire: Projector with HDMI connection
- In Library: TV with HDMI connection

Usage

- Connect the HDMI of the TV/projector to the laptop
- Connect the Logitech MeetUp camera to the laptop using the USB cable (if necessary, use a USB-C to USB-A adapter)

- In the video conferencing program, select the Logitech MeetUp Speakerphone device (microphone and camera) in the audio and video settings. For the speaker, select the appropriate device depending on if you are in the Grand Auditoire, Petit Auditoire or Library (see images below)
- Use the Logitech MeetUp remote to adjust the tilt/pan/zoom of the camera as required

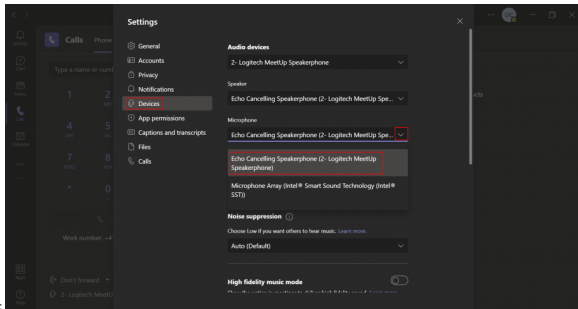

- Mute or unmute the microphone using the remote. The LED above the camera is red when muted and white when unmuted
