Adding or removing members from a project

 Adding or removing members to a project can be done only once a project is in an "approved" state.

Adding or removing members to a project (procedure)

- Authentication as the PI of the project (UNIL login & password)
 - <u>https://conference.unil.ch/research-resource-requests</u>
- Press the home button
- Check if the project is in an "approved" state
- Press the add members button
- Enter a coma separated list of users (only UNIL usernames)
- Press the add button
- Verify that the added users are present in the current member list
- If needed, remove a user by pressing the user specific remove button
- Provisioning in the authentication systems will be done overnight
